The Freedom to Choose Schools

Schools give us the opportunities to succeed in life, they are the keys to open many doors along the path of life. Each school gives a slightly different key, for instance, a regular high school key opens many doors, but the doors can only open a little bit, making it difficult to get into the room beyond. However, more focused schools like the one I go to offer a different key, one that opens fewer doors than the first, but opens them all the way, offering a surer path inside. There are hundreds of thousands of doors out there, each one has a different prospect and future, some are better than others and require special, rare keys which are hard to come by, but everyone can get these keys if they work hard enough for it. This is why it is important that we be able to choose our schools, to ensure our futures the way we want them.

There are many schools out there, each one offering different ways of teaching and learning. People these days have more to choose from than ever before in the history of the Earth, that is why we need to make the right choice, because what we choose will affect the way we spend our life. There is the right school out there for everyone, even those who show a persistence to not learn have a school which will allow them to become successful and happy. It is just the daunting task of finding the right one. The first thing you should do is find all the schools near you that offer a refined education, then from that list, find one that interests you!

Just choosing a school and going there isn't enough, you have to show a desire to be there! Teachers don't want to teach students who dislike the school and keep other willing students from learning the way they should. If you are messing around and disrupting other students from becoming successful, you need a new school, one that will hold your attention make learning interesting and fun. In the cases of technical and medical charters, you need to be able to cope with the new work load to, , for these schools offer a much more higher grading and standard system than regular high schools, this also means more homework. Your family should also be involved in your school, helping and encouraging in your decision to attend this school.

I go to a charter school and am very glad that I do. My school offers a very in depth education in computers and engineering, and I have learned things already that I have never before dreamed possible with computers. If I had gone to my home high school, I could have never learned the things I know now. I believe that this school will offer me a bright future in engineering and computers.

The freedom to choose schools is, I believe, the most important part of the education system. It allows kids to continue to study more subjects better than any normal high school class. Being able to choose our schools, more than anything, will ensure a brighter future to this new young generation. However, kids have to make sure that that school is the right one for them. Choosing a school that fits you is the best thing you can do for a better future.
